SKIN CARE

**red flower**

Red Flower was created from a deep-rooted love of the land and spirituality, as well as a sense of science and holistic medicine founded on the principles of world traditions, sustainable sourcing, ritual and well-being, something that cannot be bottled, but is embraced. Red Flower is a calling, a ceremony to feel all of the senses, a moment taken to reconnect and restore. All products are created around cultural body-care rituals from around the world. From the Onsens of Japan to the Hammams of Turkey, we tell the story of a destination through scent and by capturing the spiritual potential of native plants and extracts that are entirely botanically based, 100 percent vegetarian and paraben-free. Red Flower was founded by Yael Alkalay with a vision for people to create ritual and beauty in their everyday lives. [www.redflower.com](http://www.redflower.com)
